MACY-PAN®

He5000 Club

The Largest & Most Versatile Hyperbaric Living Space

Welcome to the Club –
where hyperbaric therapy meets lifestyle.

Why "Club"?

The He5000 Club is the largest and most iconic model in the He5000 series. The name "Club" reflects its exceptional spaciousness – it is not just a hyperbaric chamber, but a living space under pressure.

Inside the Club, you can create virtually any environment

Hyperbaric Gym

Exercise while breathing high-purity oxygen for faster recovery.

Spa & Wellness Studio

Place a beauty bed and invite a therapist for in-chamber rehabilitation.

Pet Friendly resort

Enjoy a high-oxygen environment together with your pet (safety protocols apply).

4 Person Meeting Room

Conduct business conferences in a unique, energizing setting.

Classic Oxygen Therapy Room

Use as a standard multi person hyperbaric treatment space.

The Club adapts to your imagination – therapy, work, relaxation, or social bonding.

Cylindrical Design Optimized for Size & Safety

The He5000 Club retains the inherently safe cylindrical pressure vessel shape, but with advanced stress analysis to safely accommodate 2.0 ATA operation at a much larger scale.

Available interior lengths

2.5 meters(8.2 ft)

standard
spacious configuration

3.0 meters (9.84 ft)

extra-large
for ultimate comfort

Despite its generous dimensions, the Club maintains a perfect safety margin. The whole structure is reinforced with flanges at critical joints, ensuring that even the largest version performs flawlessly at 2.0 ATA.

Engineered for Excellence
Built for You

Solid Construction – Quiet, Seamless, Easy to Install

Full stainless steel monocoque
No screws, no welded seams inside the pressure zone.

Exceptionally quiet during pressurization
no creaking or popping from bolted connections.

Simple on site
installation thanks to the integrated design.

1.3x TESTED

Every unit is hydrostatically tested at 1.3 times the working pressure – third party verified safety.

100% Hydrostatic Tested

⩽45dB Ultra-Quiet Operation

Integrated Simple Installation

Automatic Pneumatic Door

One-Touch Simplicity

Say goodbye to old fashioned manual doors that require you to hold or lock them during pressurization.

The He5000 Club features Macy Pan’ s proven cylinder driven automatic door system

One-button operation
The door seals automatically as pressure builds.

Hands-free pressurization
No need to hold the door closed.

Smooth, reliable, and safe
Works every time.

Product Specifications

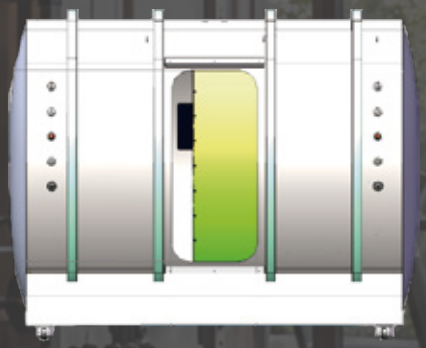

HE5000 Club

Specification	Details
Model	HE5000 Club
Type	Hard Multi-Person Vertical Cabin
Capacity	2-4 persons
Operating Pressure	100Kpa(2.0ATA)±3
Oxygen Purity	93% ± 3%
Pressurized Flow Rate	360L/mim
Material	Stainless steel + Polycarbonate
Dimensions	**standard**: 98.4" × 63.8" × 78.4" in 2,500mm (L) × 1,620 mm (W) × 1,990 mm (H)
	extra-large: 118.1" × 64.1" × 78.7" in 3000mm (L) × 1,630 mm (W) × 2000 mm (H)
Weight	1168kg
Power	3,300W
Voltage	110V60hz / 220V 50hz / 230V 50hz / 240V 50hz optional
Noise Level	≤62 dB (external)
Boost Time 0-2.0ATA	16min 10s
Working Pressure	100Kpa(2.0ATA)±3
Pressurized Medium	Air
Cabin Temperature	Ambient temperature +3~6°C
Applications	Wellness, Sports Recovery, Beauty, Neurological Support

Multi Person Breathing Safety

BIBS Mask System & Fire Code Compliance

With multiple occupants inside, breathing safety is paramount. The Club is equipped with a dedicated BIBS mask system for each person.

Oxygen delivery on inhalation

Each user receives a therapeutic dose of oxygen.

CO_2 removal on exhalation

Exhaled carbon dioxide is vented directly outside the chamber.

Strict US fire code compliance

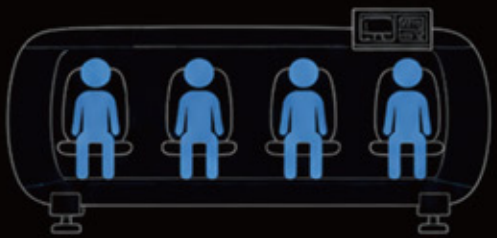

The system ensures that the internal oxygen concentration **never exceeds 23.5%** , while CO_2 levels remain well below any hazardous limit.

$O_2 \leqslant 23.5\%$

CO_2 Safe Level

This design allows multiple people to breathe safely without risk of oxygen enrichment or CO_2 buildup.

Unique Water-Cooled Air Conditioning

Comfort & Fire Safety

Traditional cooling methods can dry out the internal air, increasing static electricity and potential fire risk. Macy Pan’ s exclusive water cooled air conditioning solves this problem elegantly.

High air volume

Effectively lowers the internal temperature for exceptional comfort.

Maintains moderate humidity

The water cooled cycle retains a small amount of moisture inside the chamber.

Prevents static discharge

Reduces fire risk associated with overly dry environments.

The water cooled AC is not just a comfort feature –

IT IS A SAFETY NECESSITY,

AND IT IS UNIQUE TO MACY PAN.

Easy Depressurization

Manual or Fully Automatic

Exiting the Club is as convenient as entering.

Two manual pressure release valves

Open either one to depressurize manually at any time.

Fully automatic program control

· When the set treatment time ends, the unit beeps to notify you.

· Then, without touching anything, the chamber automatically depressurizes.

· Once pressure is equalized, simply open the door and step out.

No complex procedures.
No waiting for attendants.

Tailored Pressure Options

From Beginners to Therapy Patients

Although the Club is rated for 2.0 ATA (medical grade) , you can choose from three pressure levels directly on the touch screen

1.5 ATA
Ideal for beginners and general wellness users

1.8 ATA
For intermediate therapeutic needs

2.0 ATA
Full medical grade pressure for clinical treatment protocols

This flexibility makes the Club suitable for a wide range of users – from first time visitors to chronic condition patients.

Communication & Safety Features

Crystal clear intercom system

Two way communication between inside occupants and outside operator.

Emergency alarm button

Inside the chamber, any user can press the emergency button to immediately alert the attendant outside for assistance.

Reliable Communication
Stay connected, always.

Immediate Response
Help is just one press away.

Built for Safety
Your well-being is our priority.

Global Certifications
Your Assurance of Safety

The Macy-Pan He5000 Club is certified to the highest international standards.

INTERNATIONAL CERTIFICATIONS

CERTIFICATION	SCOPE
ISO 13485	Medical device quality management
ISO 9001	General quality management
ASME (USA)	Pressure vessel certification
PED (Europe)	Pressure Equipment Directive
CE (Electrical)	EU electrical safety
IEC 60601	Medical electrical equipment safety

ADDITIONAL VERIFICATIONS

Non toxic & flame retardant interior
All materials independently tested.

1.3× pressure testing
Each design validated at 1.3 times working pressure.

Hydrostatic test report for every unit
We can provide the individual test report for your chamber.

PICC Global Product Liability Insurance
Underwritten by The People’ s Insurance Company of China (PICC) with worldwide coverage.

🛡️ Uncompromising Quality: Every single unit goes through severe multi-point calibration before deployment.

MACY-PAN®

The He5000 Club

Redefining What a Hyperbaric Chamber Can Be

Larger. Safer. Smarter. More versatile.

Whether you are healing, training, relaxing, or meeting,
the He5000 Club invites you to experience hyperbaric therapy as a lifestyle.

Your space. Your pressure. **Your club.**
